

# Clarksville Light & Water

## Trade a Tree Program

Property owners inside the Clarksville Light & Water service territory that have a problematic trees growing into the primary power lines can have them replaced with small deciduous trees for free. The first step in trading your large tree with a small tree is to notify us and we will inspect your tree or trees growing near the primary power line. If your property qualifies for the program, Clarksville Light & Water will remove the problematic tree, then you can choose which of the following type of tree you would like to have planted from the list below. Just place a **X** or **✓** in the appropriate box below to select the replacement tree you want.

20' Tall and 10' Wide  
White Bloom  
Evergreen  
Full Sun  
Drought Tolerant

### Guarantee Policy:

We have chosen a local nursery to provide the listed trees. Blossomberry Nursery strives to grow and sell the highest quality plant material. They take extra special care to grow quality plants in order to give you a good start. But once you take them from their care, no one can guarantee your plant will stay alive except you! Please take care of your plants or contact a professional at Blossomberry to assist you.

It is our aim for your plants to be successful. We and the nursery will gladly offer any assistance in regard to the specific plant's proper care. Ultimately it is the responsibility of the customer to provide adequate irrigation to the plant during all seasons (yes, in the winter too). Blossomberry guarantees their plant material will be free of disease and insect damage at the time of sale or installation. The guarantee does not cover animal damage, acts of God, lack of reasonable care by the homeowner including, but not limited to watering, feeding, improper placement, or proper pest control

Should you notice a problem, it is your responsibility to contact Blossomberry Nursery as soon as possible so that they can recommend and/or provide preventative maintenance to mitigate any further damage.

Even so, it is a fact that some plants will not survive. In those cases, our guarantee will cover plants to be replaced one time at no charge for the materials and labor. This is valid for up to six months from the date of purchase. Replacement plants are not warranted. Liability not to exceed plant value. We will give you a copy of the guarantee on the date of planting and will require that document along with the original receipt to honor this guarantee.

### Next Steps

After you have chosen your tree, the Clarksville Light & Water will arrange for your tree to be delivered and planted for you in the appropriate designated place by a professional from the nursery they have come from. Description and location of tree or trees to be removed:
